## Sieves and Accessories

### TEST SIEVES

The test sieves are manufactured in the UK to international quality assurance standards. A complete range of full depth sieves of woven wire and perforated plate is available in 200mm, 300mm, and 450mm diameters. Controls sieves are competitively priced and fully interchangeable with other makes of metric sieves. UKAS Certificated Sieves are available on request.

### Stainless Steel Construction

The test sieves have frames of stainless steel, which is more durable and longer lasting than standard brass construction sieves.

### Woven wire mesh

The woven wire series sieves feature stainless steel mesh and are available in apertures from 38µm through to 125mm.

### Square hole perforated plate

The perforated plate is of tinned steel and is available in sieve apertures from 4.00mm through to 125mm.

### Certification

The sieve specifications are clearly marked on sieve, including the serial number and other information for identification and traceability. Each sieve is supplied with a certificate of conformance to BS410 (AS1152).

### Accessories

Geo-Con Products supply a complete range of sieve accessories, including sieve brushes, wet washing sieves and attachments, ultrasonic cleaners and sieve shakers.
