

# Compression Test Kit

## Accessories

### ADVANCED PAVEMENTS TESTING SYSTEMS

Our Compression Test Kit is designed to meet the requirements of a range of testing standards.

Versatile and easy to set-up, this test kit is the perfect accessory to complement your IPC Global testing system.

## Specifications

### Features

- Precision engineered
- Easy to set-up and use
- Integrated LVDT holders
- Constructed using high quality materials

### Test Standards

- AS 2891.12 – Permanent Deformation (Creep)
- BS 598-111 – Permanent Deformation (Creep)
- EN 12697-25A – Cyclic Compression

### Dimensions and Weight

Size	265 x 215mm (HxDia)
Weight	12kg

### Ordering Information

PV70180 – Compression Test Jig Base Platen & LVDT clamps  
 PV70183 – LVDT (+/-5mm) UTM  
 PV72304 – LVDT (+/-5mm) AsphaltQube

#### EN 12697-25A – Cyclic Compression

PV70184 – Cyclic Compression Test Top Platen for 150mm Dia Specimens  
 UTS0030 – UTS030 – Asphalt Permanent Deformation Test

#### AS 2891.12, BS 598-111 – Permanent Deformation (Creep)

PV70181 – Permanent Deformation Test Top Platen for 100mm Dia Specimens  
 PV70182 – Permanent Deformation Test Top Platen for 150mm Dia Specimens  
 UTS0014 – UTS014 - Asphalt Permanent Deformation Test  
 Additional accessories may be required to create a working testing system.  
 Please contact us for advice.

## Cyclic Compression Test EN 12697-25A

This European Standard contains two test methods to determine the resistance to permanent deformation of a bituminous mixture by cyclic compression with confinement. The tests make it possible to rank various mixes or to check on the acceptability of a given mix. Confinement is used in order to obtain realistic test results for gap-graded mixes.

Cyclic Compression Test  
EN 12697-25A

## Permanent Deformation Creep Test BS 598-111; AS 2891.12

The Permanent Deformation Test would typically be used to gauge the relative performance of asphalt mixes for road pavement design by determining the long term rutting performance. The test measures permanent deformations and strains in the vertical axis of the specimen under load.

Permanent Deformation Creep Test

## ► IPC Global Customer Care

**At IPC Global we are proud of our products.**

We are dedicated to supplying high quality, accurate, affordable, easy-to-use systems for Advanced Testing of asphalt, binders and other pavement materials. As a valued customer of IPC Global you will receive continuous, expert support and advice for your instrument. Furthermore, we offer full installation and training in the correct operation of your IPC Global equipment. For support from our expert Customer Care Team, contact your local IPC Global-Controls office/distributor or email [ipcglobalsupport@controls-group.com](mailto:ipcglobalsupport@controls-group.com).

Visit our website for more information [www.controls-group.com/ipcglobal](http://www.controls-group.com/ipcglobal).
