

DATA SHEET

Water in bitumen test set

AASHTO T48 | ASTM D244 | AASHTO T55 | AASHTO T59

GENERAL DESCRIPTION

Used for determining the water content of bituminous and petroleum materials by distillation with a water immiscible, volatile solvent.

Comprising:

- Glass still 10 ml
 - Glass receiver
 - Glass condenser
 - Electric heater with thermoregulator
-
- Power: 250 W
 - Weight approx.: 4 kg

ORDERING INFO

81-B0155/A

Water in bituminous materials test set (Dean-Stark). 230 V, 50-60 Hz, 1 ph

81-B0155/AZ

Water in bituminous materials test set (Dean-Stark). 110 V, 60 Hz, 1 ph
